## **GGR 352 Earth Day Poster Assignment**

**Earth Day at SSC is Monday, April 14, 2008.** The student poster competition will be held in the Ellison Center's MLK Room from 11:00 AM -12:15 PM. Set-up time begins at 10:30 AM. Attached is a set of guidelines about preparation of a poster. Date assignment passed out: Thursday, Jan. 31, 2008.

Some suggestions for poster topics by Prof. John Hayes: [Note: This is just to give you some ideas! Feel free to choose your own topic--although I do have to approve all topics.]

- 1. Possible species loss with global warming climate change
- 2. Effects of global warming climate change & habitat loss on wildlife migrations
- 3. Great Plains groundwater: a look at the dilemma of GW mining and global warming climate change
- 4. Air pollution impacts on the traditional diets of indigenous peoples of the Arctic
- 5. A review of the environmental and social impacts of salmon farming
- 6. A review of the environmental impacts of coastal aquaculture in New England
- 7. A social impact analysis of the Cape Wind project
- 8. Environmental & social justice issues of agriculture in California's Central Valley
- 9. Agriculture and the nitrogen cycle: a review
- 10. A review of the health effects of chloramines in municipal drinking water
- 11. Agricultural chemicals and stream water quality in the Great Plains..or other region
- 12. An environmental review of roadway de-icing in New England
- 13. A life cycle analysis of coal-based power--from its mining to its combustion
- 14. A critical review of the pros and cons of clean coal technology
- 15. A critical review of the pros and cons of nuclear power in the 21<sup>st</sup> century
- 16. A critical review of the env. and social impacts of corporate hog farming
- 17. A GIS analysis of acid rain impacts on ponds and lakes of New England
- 18. A geographic analysis of the largest violators of the Clean Air Act
- 19. A critical review of the ecological threats in New England from invasive species
- 20. Migratory songbirds in New England: Summer and winter habitat endangerment issues
- 21. A geographical analysis of endangered rivers in North America..... or the Great Plains ...... or in New England ...... or the U.S. ......or?
- 22. The logging roads debate in the American West: a critical review
- 23. Dam removals on America's rivers: a new era in U.S. water resources policy?
- 24. Agribusiness, corn, and the American diet: a life cycle analysis of corn production
- 25. Sustainable agriculture: what is it and can it be done?

## Deadlines related to poster research and poster preparation for Earth Day:

- 1) Tue., Feb. 26: a) Turn in typed thesis statement with one or more tentative poster titles; [note: Prof. Hayes is willing to offer advice here!]
  - b) attach at least three journal references with their abstracts and three web-related references.
- 2) Thur., Mar. 20: a) Turn in typed draft of your poster abstract: minimum of 250 words, with minimum of 8 references, of which at least 4 must be from the scholarly journal literature; maximum abstract length would be approx. 500 words, but there is no real set maximum except to recognize that this is a poster and not a paper!
  - b) Turn in final version of poster title.
  - c) Turn in rough draft of your poster presentation--this would include items (a) and (b) above, of course, but also your tentative selection of images, tables, photos, and text that you envision your poster containing. Please arrange the above in a logical order. It is OK if these components are on regular size paper at this stage. Some students choose to develop their poster using Microsoft Publisher software.
- 3) Tue., Apr. 8:
- a) Poster presentations in class. Final version of poster dueready for display at the Earth Day Student Poster Competition. This will allow for some constructive input, that could possibly be incorporated into your poster. Our goal, however, is that your poster is ready to go at this time and that you/we are working on getting you ready to handle questions from the judges and from the public.
- b) Remember that your poster needs a prominent title, your name and affiliation (my class); normally one attaches their references (bibliography) to the back of the right fold of the poster. The front of your poster should have a label (perhaps in the lower right) stating that your references are attached to the back). Copies of abstract with title and references to Prof. Hayes. Best of luck to all of you!!
