

# NATHALIE MIEBACH

**Artists' Presentation**

**MONDAY, MARCH 22**

**Meier Hall, Room #300**

**11:00 AM - 12:00 PM**

“My work focuses on the intersection of art and science and the visual articulation of scientific observations. Using the methodologies and processes of both disciplines, I translate scientific data related to astronomy, ecology and meteorology into woven sculptures.”

This presentation is sponsored by the SSC ART DEPARTMENT and is in conjunction with the Earth Days events in April. Please contact John Hayes, co-chair of the Earth Day Planning Committee, [jhayes@salemstate.edu](mailto:jhayes@salemstate.edu), for further information.
