

April 17, 2009

Meier Hall 238

2:30 P.M.

Sara Cohen is a Water Resources Specialist at the Massachusetts Department of Conservation and Recreation. She works on water policy, planning, and research to promote healthy streamflows, effective storm water management, and sustainable drinking water supplies. Currently, she manages a \$1 million federal grant to demonstrate and evaluate the potential of low-impact development and water conservation techniques to improve streamflows in Massachusetts' Ipswich River. She has a Masters of Science in Resource Ecology and Management and a Masters of Urban and Regional Planning, both from the University of Michigan, and a Bachelor of Science in Biology from Yale University.

This activity is part of SSC Earth Day Week Series 2009 and is co-sponsored by the Economics Club. For more info about all of the events of Earth Day Week, April 13-17 and April 22, please go to [dgl.salemstate.edu/earthday](http://dgl.salemstate.edu/earthday)

## 2008-2009 Economic Speaker Series

Strategies to address water shortages and depleted streamflows in Massachusetts: an interactive discussion
